📚 Courses

AWS And DEVOPS - Login 360   Chennai

Python FullStackDevelopment - CSC   Thiruvannamalai

📁 Projects

Chatbot Application using Python flask framework And NLP | At my final semester
Developed a Chatbot Application using Python and Flask framework, integrating Natural Language Processing (NLP) for intelligent responses.

Chatbot using AWS Lex(MINI PROJECT) | Login 360
Developed a chatbot using AWS Lex, leveraging built-in NLP tools for voice and text-based interactions. Configured intents, slot types, and fulfillment through AWS Lambda for dynamic response generation. Integrated the chatbot with web and mobile platforms, ensuring smooth and responsive user experience.
